

CUSTOMS BASICS FOR FREIGHT FORWARDERS, DISPATCHERS AND LOGISTICIANS

Perfect for beginners: This Webinar is designed for employees of customs representatives, forwarding agents and logisticians who deal with customs issues, as well as for newcomers in the field of customs, and provides an initial overview of the area of customs and international trade compliance.

CONTENT

In addition to the EU customs law and an introduction to the legal framework and points of contact with customs in the company, participants will learn:

- Customs declarations requirements
- The roll, basics and issues of a representative
- Systematics of electronic customs clearance
- Customs simplifications and the role of the AEO
- Customs procedures in export
- Final export, temporary export
- Import customs procedures
- Transit, Temporary Storage and Bonded Warehouse
- Release for free circulation and return goods
- Special procedures: transit, processing, use, storage

LEARNING OBJECTIVES

After completing the webinar, participants should be able to answer the following questions:

- When do customs regulations need to be observed?
- Which authorities are responsible for customs matters?
- Which company departments may be involved in customs procedures?
- Which legal regulations are relevant?
- Which customs forms need to be considered?
- What customs procedures do exist and how to handle transit documents?
- Which potential can be used when correctly handling the customs requirements?
