

BASIC KNOWLEDGE OF INTERNATIONAL TRADE COMPLIANCE (EXPORT CONTROL)

INTRODUCTION to the field of foreign trade:

This webinar is for everyone who needs an introduction to the field of international trade including import and export controls. Legal backgrounds are as fundamental as the definition of the company's own areas of application. Participants with and without prior knowledge will receive a comprehensive overview as well as suggestions for the organization of operational practice in this seminar.

CONTENT

- Introduction and legal basics of export control DE/EU
- Overview of existing sanctions and embargos
- Checking against existing restrictions
- Approval procedures and types
- Responsibilities of companies and employees
- Classic sources of error and liability risks in dealing with import and export control

LEARNING OBJECTIVES

After completing the webinar, participants should be able to answer the following questions:

- What are the foreign trade law inspection duties that I must necessarily comply with?

- What are the essential regulations to be observed when dealing with shipments relevant to customs and foreign trade law?
- By whom, when and where should import and export control relevant topics be considered in customs declarations?
- How do I obtain the necessary knowledge about my products in the context of import and export control?
- How do I identify potential problems when creating customs declarations considering foreign trade law issues?
- What typical pitfalls exist when dealing with customs-relevant shipments and how are these ideally to be avoided?
- How do I prepare for foreign trade and customs inspections?
